

Small Area Underfloor Heating Pump Mixer Set (Up To 30m²)

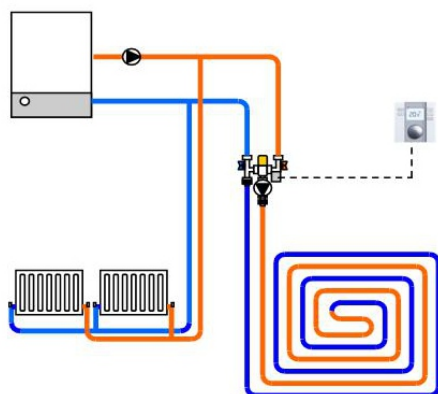

Introduction

Inta's small area underfloor pump mixer kits are specifically designed for instances where an underfloor loop is an addition to an existing conventional system. Our pump mixer kits are suitable for floor areas up to 30m² and have an adjustable temperature range of 30 - 60°C making them suitable for a variety of floor coverings.

- Blends flow and return to keep a constant floor temperature
- Suitable for floor areas up to 30m²
- 15mm inlet connections from the central heating circuit
- 1/2" BSP female connections to the underfloor circuit
- Temperature range 30 - 60°C
- Factory set at 43°C
- Robust design
- Adjustable left or right hand installation
- EUP compliant
- Integral full bore isolation valves on primary supplies
